Commitment. Quality. Success.

It’s easy to stake claim that you’re committed to your customer’s needs. The question is, what are you doing to assure your client’s needs, as well as the end patient’s needs are fully understood and met?

At Seabrook International, our success is validated by way of our customer’s satisfaction and in the successful delivery of the instruments and implants we manufacture as they’re utilized in everyday surgical procedures.

We’ve built our reputation as being an integral supplier to the world’s largest manufacturers of orthopaedic devices through selfless channels of customer service, our dedication to the trade, and true partnership throughout the entirety of the engineering, manufacturing and quality processes.

- We’re responsive
- We’re honest
- We deliver
- We keep true to our commitment of providing industry-leading quality
- We are always ahead of the curve in regards to our in-house technologies
- We love what we do, and that is continually showcased in our work

We pride ourselves on decades of industry experience in manufacturing, quality, design, engineering, and thoughtful cultivation of company culture. It’s a fundamental policy of Seabrook to ensure customer satisfaction through a process of continuous improvement and compliance with all customer and medical device manufacturing requirements.

Providing Limitless Medical Manufacturing Possibilities:
- Instruments
- Implants
- Custom Devices
Seabrook International is based just north of Boston, in Seabrook, New Hampshire. Founded in 1973, we are a privately held company that has experienced continuous operative growth for over 40 years. We operate within approximately 80,000 square feet between facilities in two buildings.

Our business is 100% comprised of medical device manufacturing, where we participate as a top tier supplier of surgical instruments and implants to the world’s largest and most prestigious providers of orthopaedic products and solutions.

With very broad capabilities, we specialize in the manufacture of finished products for the spine, trauma, extremities, and large joint reconstruction market sectors. Our manufacturing operations include state-of-the-art equipment and process technology backed by a culture of quality and service that is both recognized and respected by our OEM Customers.

It’s in this commitment to quality and robust manufacturing technologies that provides us a competitive edge in meeting our customer’s needs and expectations.

**» PRECISION INSTRUMENTS**

We build from the heart. Constructing instruments instrumental in everyday life.

Seabrook International is the premier supplier of surgical instruments sought after by leading orthopaedic medical device manufacturers. We pride ourselves on the commitment to meet all of our customers’ specific needs. With nearly every type of CNC machining center and a vertically integrated approach to manufacturing processes, we are equipped for the most demanding tolerances and complex geometries while maintaining full control through every step.

Examples of medical instruments we manufacture:

- Screw and other shaft type drivers
- Inseters
- Rasp, trial, and shivers
- Compressors and distractors
- Complex assemblies
- Cutting guides
- Alignment devices
- High-performance polymer trials and components
- Miscellaneous specialized instruments

Surgical instruments leave our factory fully assembled and ready for use. The combination of effective process controls and our staff of highly trained professionals - who understand the use and service requirements of every device manufactured and prepared for shipment - ensures the highest performance and fitness for immediate use.

**» IMPLANTS**

We’re not just delivering parts. We’re changing lives.

Seabrook International has a newly equipped, fully validated and dedicated facility that focuses on the production of implantable medical devices. We manufacture a wide variety of implants that include:

- Pedicle screws
- PEEK cages
- Interbody fusion components
- Mobility preservation devices
- Plates
- Rods
- Connectors
- Guide wires
- And more…

Our implant facility boasts the latest state-of-the-art production equipment set up for highly efficient and scalable manufacturing.

Extensive industry know-how and highly educated engineers allow us to manufacture your surgical implants from simple to the most advanced configurations. Seabrook is involved with implant projects that improve surgical outcomes for today’s latest and most innovative orthopaedic procedures.

We’re contracted for our precise attention to detail, our unwavering commitment to quality and the extraordinary value that is present in all of the products we manufacture.

**» CUSTOMS & SPECIALS**

You need experienced hands to craft the unknown.

What sets us apart from our competitors is the ability to produce and quickly turn around custom and make-to-order instruments with lead times measured in days, not weeks or months.

With dedicated manufacturing, quality, and engineering resources, we are depended on by our customers to deliver thousands of custom and specialty instruments each year. Our scale and range of expertise are unmatched in the industry.

We collaborate directly with clients and surgeon requests to create innovative, specialized solutions fit for case specific needs. It’s a win-win across the board. We’ve steadfast when it comes to accommodating your needs, and our facilities enable us to provide individualized custom products, at your demand, on demand.

In short, we’re creating limitless possibilities with microscopic precision.
